Contributors .......................................................... xix
Preface ................................................................. xli

PART 1  The Profession of Medicine

1 The Practice of Medicine ............................................. 1
 The Editors

2 Promoting Good Health ............................................. 8
 Donald M. Lloyd-Jones, Kathleen M. McKibbin

3 Decision-Making in Clinical Medicine ......................... 13
 Daniel B. Mark, John B. Wong

4 Screening and Prevention of Disease ......................... 22
 Katrina A. Armstrong, Gary J. Martin

5 Health Care Systems in Developed Countries ............... 27
 Richard B. Saltman

6 The Safety and Quality of Health Care ....................... 33
 David W. Bates

7 Racial and Ethnic Disparities in Health Care ................. 37
 Joseph R. Betancourt, Alexander R. Green

8 Ethical Issues in Clinical Medicine ....................... 44
 Bernard Lo, Christine Grady

9 Palliative and End-of-Life Care ............................. 47
 Ezekiel J. Emanuel

PART 2  Cardinal Manifestations and Presentation of Diseases

SECTION 1  Pain

10 Pain: Pathophysiology and Management ..................... 65
 James P. Rathmell, Howard L. Fields

11 Chest Discomfort ............................................. 73
 David A. Morrow

12 Abdominal Pain ............................................. 81
 Danny O. Jacobs

13 Headache .................................................. 85
 Peter J. Goadsby

14 Back and Neck Pain ........................................ 89
 John W. Engstrom

SECTION 2  Alterations in Body Temperature

15 Fever ................................................................ 102
 Charles A. Dinarello, Renueen Poret

16 Fever and Rash ............................................... 105
 Elaine T. Kaye, Kenneth M. Kaye

17 Fever of Unknown Origin ..................................... 114
 Chantal P. Bleeker-Rovers, Jos W. M. van der Meer

SECTION 3  Nervous System Dysfunction

18 Syncope ................................................................ 122
 Roy Freeman

19 Dizziness and Vertigo ......................................... 129
 Mark F. Walker, Robert B. Daroff

20 Fatigue .......................................................... 132
 Jeffrey M. Gelfand, Vanja C. Douglas

21 Neurologic Causes of Weakness and Paralysis ............ 135
 Michael J. Aminoff

22 Numbness, Tingling, and Sensory Loss ..................... 139
 Michael J. Aminoff

23 Gait Disorders, Imbalance, and Falls ....................... 143
 Jennifer M. Baker, Lewis R. Sudarsky

24 Confusion and Delirium ..................................... 147
 S. Andrew Josephson, Bruce L. Miller

25 Dementia ..................................................... 152
 William W. Seeley, Bruce L. Miller

26 Aphasia, Memory Loss, Hemispatial Neglect, Frontal Syndromes, and Other Cerebral Disorders .... 157
 M. Marcel Mesulam

27 Sleep Disorders ............................................. 166
 Thomas E. Scammell, Clifford B. Saper, Charles A. Czeisler

SECTION 4  Disorders of Eyes, Ears, Nose, and Throat

28 Disorders of the Eye ....................................... 177
 Jonathan C. Horton

29 Disorders of Smell and Taste ................................ 194
 Richard L. Doty, Steven M. Bromley

30 Disorders of Hearing ....................................... 200
 Anil K. Lalwani

31 Sore Throat, Earache, and Upper Respiratory Symptoms ......................................................... 208
 Michael A. Rubin, Larry C. Ford, Ralph Gonzales

32 Oral Manifestations of Disease .......................... 219
 Samuel C. Durso

SECTION 5  Alterations in Circulatory and Respiratory Functions

33 Dyspnea .......................................................... 226
 Rebecca M. Baron

34 Cough .......................................................... 230
 Christopher H. Fanta

35 Hemoptysis .................................................... 232
 Anna K. Brady, Patricia A. Kritek

36 Hypoxia and Cyanosis ........................................ 234
 Joseph Localzo

37 Edema .......................................................... 237
 Eugene Braunwald, Joseph Localzo

38 Approach to the Patient with a Heart Murmur ............. 240
 Patrick T. O’Gara, Joseph Localzo

39 Palpitations .................................................... 249
 Joseph Localzo

SECTION 6  Alterations in Gastrointestinal Function

40 Dysphagia ....................................................... 249
 Ikuo Hirano, Peter J. Kabradas

41 Nausea, Vomiting, and Indigestion ......................... 253
 William L. Hauer

42 Diarrhea and Constipation .................................. 259
 Michael Camilleri, Joseph A. Murray
**CONTENTS**

PART 3 Pharmacology

- 63 Principles of Clinical Pharmacology .................. 419  
  Dan M. Roden
- 64 Pharmacogenomics ........................................... 429  
  Dan M. Roden

PART 4 Oncology and Hematology

SECTION 1 Neoplastic Disorders

- 65 Approach to the Patient with Cancer .................. 435  
  Dan L. Longo
- 66 Prevention and Early Detection of Cancer .......... 443  
  Jennifer M. Crosswell, Oris W. Brawley, Barnett S. Kramer
- 67 Cancer Genetics ............................................... 452  
  Fred Bunz, Bert Vogelstein
- 68 Cancer Cell Biology .......................................... 461  
  Jeffrey W. Clark, Dan L. Longo
- 69 Principles of Cancer Treatment ......................... 480  
  Edward A. Sauvage, Dan L. Longo
- 70 Infections in Patients with Cancer .................... 502  
  Robert W. Finberg
- 71 Oncologic Emergencies ..................................... 511  
  Rasim Gucalp, Janice P. Dutcher
- 72 Cancer of the Skin ........................................... 522  
  Brendan D. Curti, Sancy Leachman, Walter J. Urba
- 73 Head and Neck Cancer ...................................... 532  
  Everett E. Vokes
- 74 Neoplasms of the Lung ...................................... 537  
  Leora Horn, Christine M. Lovely
- 75 Breast Cancer .................................................. 555  
  Daniel F. Hayes, Marc E. Lippman
- 76 Upper Gastrointestinal Tract Cancers ................. 566  
  Robert J. Mayer
- 77 Lower Gastrointestinal Cancers ......................... 572  
  Robert J. Mayer
- 78 Tumors of the Liver and Biliary Tree .................. 578  
  Josep M. Llovet
- 79 Pancreatic Cancer ............................................ 591  
  Daniel D. Von Hoff
- 80 Neuroendocrine Tumors of the Gastrointestinal  
  Tract and Pancreas ............................................. 596  
  Robert T. Jensen
- 81 Renal Cell Carcinoma ....................................... 616  
  Robert J. Motzer
- 82 Cancer of the Bladder and Urinary Tract ............. 619  
  Noah M. Hahn
- 83 Benign and Malignant Diseases of the Prostate .... 623  
  Howard I. Scher, James A. Eastham
- 84 Testicular Cancer ............................................ 632  
  David J. Vaughan
- 85 Gynecologic Malignancies ................................ 637  
  David Spriggs
- 86 Primary and Metastatic Tumors of the  
  Nervous System ................................................ 643  
  Lisa M. DeAngelis, Patrick Y. Win
- 87 Soft Tissue and Bone Sarcomas and  
  Bone Metastases ................................................ 653  
  Shreyas Kumar R. Patel
- 88 Carcinoma of Unknown Primary ......................... 657  
  Gauri R. Varadhachary, James L. Abbazzese
- 89 Paraneoplastic Syndromes: Endocrinologic/  
  Hematologic ....................................................... 662  
  J. Larry Jameson, Dan L. Longo

SECTION 2 Alterations in Renal and Urinary Tract Function

- 47 Dysuria, Bladder Pain, and the Interstitial  
  Cystitis/Bladder Pain Syndrome ............................ 285  
  John W. Warren
- 48 Azotemia and Urinary Abnormalities .................... 288  
  David B. Mount
- 49 Fluid and Electrolyte Disturbances .................... 295  
  David B. Mount
- 50 Hypercalcemia and Hypocalcemia ....................... 312  
  Sundee Khosla
- 51 Acidosis and Alkalosis .................................... 315  
  Thomas D. DuBois, Jr.

SECTION 9 Hematologic Alterations

- 58 Interpreting Peripheral Blood Smears .................. 379  
  Dan L. Longo
- 59 Anemia and Polycythemia .................................. 385  
  John W. Adamson, Dan L. Longo
- 60 Disorders of Granulocytes and Monocytes ............. 394  
  Steven M. Holland, John I. Gallin
- 61 Bleeding and Thrombosis .................................. 404  
  Barbara A. Konkle
- 62 Enlargement of Lymph Nodes and Spleen ............... 411  
  Dan L. Longo

SECTION 7 Alterations in Renal and Urinary Tract Function

- 46 Abdominal Swelling and Ascites .......................... 281  
  Kathleen E. Cory, Laurence S. Friedman
- 47 Jaundice ......................................................... 276  
  Savo John, Daniel S. Pratt
- 45 Gastrointestinal Bleeding .................................. 272  
  Loren Laine

SECTION 8 Alterations in the Skin

- 52 Approach to the Patient with a Skin Disorder ........ 324  
  Kim B. Yancy, Thomas J. Lawrence
- 53 Eczema, Psoriasis, Cutaneous Infections, Acne,  
  and Other Common Skin Disorders ......................... 329  
  Leslie P. Lawley, Calvin O. McCall, Thomas J. Lawrence
- 54 Skin Manifestations of Internal Disease .................. 339  
  Joan L. Bolognia, Irwin M. Braverman
- 55 Immunologically Mediated Skin Diseases ............... 355  
  Kim B. Yancy, Thomas J. Lawrence
- 56 Cutaneous Drug Reactions ................................ 362  
  Robert G. Michelelli, Misha Rosenbach, Bruce U. Winstead,  
  Kanade Shinkai
- 57 Photosensitivity and Other Reactions to Light ........ 372  
  Alexander G. Marneros, David R. Bickers

SECTION 5 Hematologic Alterations

- 50 Bleeding and Thrombosis .................................. 281  
  Kathleen E. Cory, Laurence S. Friedman
- 49 Fluid and Electrolyte Disturbances .................... 295  
  David B. Mount
- 48 Azotemia and Urinary Abnormalities .................... 288  
  David B. Mount
- 47 Dysuria, Bladder Pain, and the Interstitial  
  Cystitis/Bladder Pain Syndrome ............................ 285  
  John W. Warren
- 46 Unintentional Weight Loss ................................ 270  
  J. Larry Jameson
- 44 Gastrointestinal Bleeding ................................ 272  
  Loren Laine
90 Paraneoplastic Neurologic Syndromes and Autoimmune Encephalitis ........................................... 668
Josep Dalmau, Myrna R. Rosenfeld
91 Late Consequences of Cancer and Its Treatment .............. 674
Carl E. Freret, Dan L. Longo

SECTION 2 Hematopoietic Disorders

92 Hematopoietic Stem Cells ................................................. 679
David T. Saddan, Dan L. Longo
93 Iron Deficiency and Other Hypoproliferative Anemias ... 683
John W. Adamson
94 Disorders of Hemoglobin ............................................... 690
Edward J. Benz, Jr.
95 Megaloblastic Anemias .................................................. 698
A. Victor Hoffbrand
96 Hemolytic Anemias ....................................................... 708
Lucio Lazzatato
97 Anemia Due to Acute Blood Loss ..................................... 723
Dan L. Longo
98 Bone Marrow Failure Syndromes Including Aplastic Anemia and Myelodysplasia ........................................... 723
Neal S. Young
99 Polycythemia Vera and Other Myeloproliferative Neoplasms ......................................................... 733
Jerry L. Spivak
100 Acute Myeloid Leukemia ............................................... 739
William Blum, Clara D. Bloomfield
101 Chronic Myeloid Leukemia ............................................. 748
Hagop Kantarjian, Jorge Cortes
102 Acute Lymphoid Leukemia .............................................. 757
Dieter Hoelzer
103 Chronic Lymphocytic Leukemia ...................................... 763
Jennifer A. Woyach, John C. Byrd
104 Non-Hodgkin’s Lymphoma ........................................... 769
Caron A. Jacobson, Dan L. Longo
105 Hodgkin’s Lymphoma .................................................. 780
Caron A. Jacobson, Dan L. Longo
106 Less Common Hematologic Malignancies ....................... 783
Ayalew Tefferi, Dan L. Longo
107 Plasma Cell Disorders .................................................. 793
Nikbil C. Munshi, Dan L. Longo, Kenneth C. Anderson
108 Amyloidosis .............................................................. 803
John L. Berk, Vaibhav Sanchorawala
109 Transfusion Biology and Therapy ................................ 809
Jeffry S. Sznajder, Pierre Tiberghien, Kenneth C. Anderson
110 Hematopoietic Cell Transplantation ................................ 816
Frederick R. Appelbaum

SECTION 3 Disorders of Hemostasis

111 Disorders of Platelets and Vessel Wall ......................... 822
Barbara A. Konkle
112 Coagulation Disorders .................................................. 830
Valder R. Arruda, Katherine A. High
113 Arterial and Venous Thrombosis .................................. 839
Jane E. Freedman, Joseph Loscalzo
114 Antiplatelet, Anticoagulant, and Fibrinolytic Drugs ........ 843
Jeffrey I. Weitz

PART 5 Infectious Diseases

SECTION 1 Basic Considerations in Infectious Diseases

115 Approach to the Patient with an Infectious Disease .......... 859
Neraj K. Surana, Dennis L. Kasper
116 Molecular Mechanisms of Microbial Pathogenesis .......... 866
Gerald B. Pier
117 Approach to the Acutely Ill Infected Febrile Patient ......... 877
Tamar F. Barlam, Dennis L. Kasper
118 Immunization Principles and Vaccine Use ...................... 884
Nancy Messonnier, Anne Schuchat, Lisa A. Jackson
119 Health Recommendations for International Travel .......... 892
Jay S. Keystone, Phyllis E. Katzarsky
120 Climate Change and Infectious Disease ......................... 900
Aaron S. Bernstein

SECTION 2 Clinical Syndromes: Community-Acquired Infections

121 Pneumonia ............................................................... 908
Lionel A. Mandell, Richard Wunderink
122 Lung Abscess ............................................................ 919
Rebecca M. Baron, Miriam Baron Barshak
123 Infective Endocarditis ................................................. 921
Adolf W. Karchmer
124 Infections of the Skin, Muscles, and Soft Tissues .......... 933
Dennis L. Stevens
125 Infectious Arthritis ...................................................... 939
Lawrence C. Madoff
126 Osteomyelitis ............................................................. 944
Werner Zimmerman
127 Intraabdominal Infections and Abscesses ..................... 952
Miriam Baron Barshak, Dennis L. Kasper
128 Acute Infectious Diarrheal Diseases and Bacterial Food Poisoning ..................................................... 959
Rickelle C. Charles, Stephen B. Calderwood, Regina C. LaRocque
129 Clostridium difficile Infection, Including Pseudomembranous Colitis ........................................... 964
Dale N. Gerding, Stuart Johnson
130 Urinary Tract Infections, Pyleonephritis, and Prostatitis ................................................................. 968
Kalpana Gupta, Barbara W. Trautner
131 Sexually Transmitted Infections: Overview and Clinical Approach .................................................. 976
Jeanne M. Marrazzo, King K. Holmes
132 Encephalitis ............................................................... 991
Karen L. Roos, Kenneth L. Tyler
133 Acute Meningitis .......................................................... 998
Karen L. Roos, Kenneth L. Tyler
134 Chronic and Recurrent Meningitis ................................. 1007
Walter J. Koroshetz, Michael R. Wilson, Avindra Nath
135 Brain Abscess and Empyema ......................................... 1013
Karen L. Roos, Kenneth L. Tyler
136 Infectious Complications of Bites ................................. 1019
Sandeep S. Jhubjal, Florencia Pereyra, Lawrence C. Madoff

PART 10 Disorders of the Gastrointestinal System

SECTION 1 Disorders of the Alimentary Tract
314 Approach to the Patient with Gastrointestinal Disease ........................................ 2177
William L. Hasler, Chung Owyang
315 Gastrointestinal Endoscopy ................................................................................... 2182
Louis Michel Wong Kee Song, Mark Topazian
316 Diseases of the Esophagus ...................................................................................... 2209
Peter J. Kabrilsis, Hsiao Hirano
317 Peptic Ulcer Disease and Related Disorders .......................................................... 2220
John V. Del Valle
318 Disorders of Absorption .......................................................................................... 2244
Henry J. Binder
319 Inflammatory Bowel Disease .................................................................................. 2258
Sonia Friedman, Richard S. Blumberg
320 Irritable Bowel Syndrome ....................................................................................... 2276
Chung Owyang
321 Diverticular Disease and Common Anorectal Disorders ...................................... 2283
Rezwan Ahmed, Susan L. Gearhart
322 Mesenteric Vascular Insufficiency ......................................................................... 2291
Satinderjit Lohcham, Mahmoud Malas
323 Acute Intestinal Obstruction ................................................................................... 2294
Danny O. Jacobs
324 Acute Appendicitis and Peritonitis ......................................................................... 2298
Danny O. Jacobs

SECTION 2 Nutrition
325 Nutrient Requirements and Dietary Assessment ................................................... 2303
Johanna Dwyer
326 Vitamin and Trace Mineral Deficiency and Excess ............................................ 2309
Paulo M. Suter, Robert M. Russell
327 Malnutrition and Nutritional Assessment ................................................................ 2319
Gordon L. Jensen
328 Enteral and Parenteral Nutrition ............................................................................ 2324
L. John Hoffer, Bruce R. Bistrian, David F. Driscoll

SECTION 3 Liver and Biliary Tract Disease
329 Approach to the Patient with Liver Disease ........................................................... 2332
Marc G. Ghany, Jay H. Hoofnagle
330 Evaluation of Liver Function .................................................................................. 2338
Daniel S. Pratt
331 The Hyperbilirubinemias ....................................................................................... 2342
Allan W. Wolkoff
332 Acute Viral Hepatitis ............................................................................................... 2347
Jules L. Dienstag
333 Toxic and Drug-Induced Hepatitis ....................................................................... 2366
William M. Lee, Jules L. Dienstag
334 Chronic Hepatitis .................................................................................................. 2375
Jules L. Dienstag
335 Alcoholic Liver Disease .......................................................................................... 2399
Mark E. Mailliard, Michael F. Sorrell
336 Nonalcoholic Fatty Liver Diseases and Nonalcoholic Steatohepatitis ............... 2401
Manal F. Abdelmalek, Anna Mae Diehl
337 Cirrhosis and Its Complications ............................................................................ 2405
Bruce R. Bacon
338 Liver Transplantation .............................................................................................. 2414
Raymond T. Chung, Jules L. Dienstag
339 Diseases of the Gallbladder and Bile Ducts ............................................................ 2422
Norton J. Greenberger, Gustave Paumgartner

SECTION 1 Disorders of the Pancreas
340 Approach to the Patient with Pancreatic Disease ................................................ 2433
Darwin L. Conwell, Norton J. Greenberger, Peter A. Banks
341 Acute and Chronic Pancreatitis .............................................................................. 2437
Darwin L. Conwell, Peter A. Banks, Norton J. Greenberger

PART 11 Immune-Mediated, Inflammatory, and Rheumatologic Disorders

SECTION 1 The Immune System in Health and Disease
342 Introduction to the Immune System ....................................................................... 2451
Barton F. Haynes, Kelly A. Sudyberg, Anthony S. Fauci
343 The Major Histocompatibility Complex ............................................................... 2480
Gerald T. Nepom
344 Primary Immune Deficiency Diseases ................................................................. 2488
Alain Fischer

SECTION 2 Disorders of Immune-Mediated Injury
345 Urticaria, Angioedema, and Allergic Rhinitis ...................................................... 2498
Katherine N. Cahill, Joshua A. Boyce
346 Anaphylaxis ........................................................................................................... 2506
David Hong, Joshua A. Boyce
347 Mastocytosis ........................................................................................................... 2508
Cem Akin, Joshua A. Boyce
348 Autoimmunity and Autoimmune Diseases ............................................................ 2510
Betty Diamond, Peter E. Lipsky
349 Systemic Lupus Erythematosus ............................................................................ 2515
Bevra Hannahs Halbn
350 Antiphospholipid Syndrome ................................................................................ 2526
Haralampos M. Moutsopoulos
351 Rheumatoid Arthritis ............................................................................................. 2527
Ankoor Shah, E. William St. Clair
352 Acute Rheumatic Fever .......................................................................................... 2541
Jonathan R. Carapetis
353 Systemic Sclerosis (Scleroderma) and Related Disorders ...................................... 2546
John Varga
354 Sjögren’s Syndrome ............................................................................................... 2560
Haralampos M. Moutsopoulos
355 The Spondyloarthritides ........................................................................................ 2563
Joel D. Täuog
356 The Vasculitis Syndromes ...................................................................................... 2574
Carol A. Langford, Anthony S. Fauci
357 Behçet’s Syndrome ................................................................................................ 2589
Haralampos M. Moutsopoulos
358 Inflammatory Myopathies ..................................................................................... 2590
Steven A. Greenberg, Anthony A. Amato

Related Harrison’s Resources

A complete collection to meet your educational, clinical, and board prep needs

**Harrison’s Online**

The online edition of *Harrison’s* is available at www.accessmedicine.com. It requires an institutional or individual subscription separate from the purchase of the print book. The online edition of *Harrison’s* features all the chapters from the print edition, plus more than two dozen supplementary chapters in print, atlas, and video formats. *Harrison’s Online* includes numerous monthly updates, from the editors of *Harrison’s*, on important new developments in medical research and practice. Easily search across the entire *Harrison’s* content set, download images and tables for presentations and lectures, view step-by-step videos on common clinical procedures, access the text of the *Harrison’s Manual of Medicine*, set up a personalized test exam for board prep, get access to chapters from new editions of *Harrison’s* months before book publication, and more.

**The Harrison’s Manual of Medicine**

The *Harrison’s Manual of Medicine* provides high-yield, rapid-access clinical summaries of *Harrison’s* content, suitable for use at the bedside. Chapters in the Manual reflect those likely to be encountered in both the inpatient and outpatient setting. The format is built for ease of use. The Manual is available in print, eBook, and app. In addition, the full text of the Manual is available to subscribers at accessmedicine.com. This format provides flexibility of format to customers, who can move back and forth between the full scope of *Harrison’s Principles of Internal Medicine* and the high-yield clinical essentials of the Manual.

The Manual includes more than 200 chapters in 17 sections and covers presenting signs and symptoms and major conditions seen in both inpatient and outpatient settings. The full table of contents is available at www.accessmedicine.com.

**The Harrison’s Self-Assessment and Board Review**

This practical resource provides more than 1000 self-assessment questions, most in board-style clinical vignette format with multiple choice answers. The explanations for the questions are comprehensive and provide detailed guidance on correct and incorrect answers. Question-and-answer sets include references to related chapters in *Harrison’s Principles of Internal Medicine* for more comprehensive understanding. Use this very handy resource for primary and recertification exam prep, for rotational shelf exams, and for general assessment of understanding of the principles of clinical medicine. This resource is available as a print book, an eBook, an app, and on accessmedicine.com, where users can create personalized testing experiences and receive instant scores on practice tests.
Preface

The Editors are pleased to present the 20th edition of Harrison’s Principles of Internal Medicine. This 20th edition is a true landmark in medicine, spanning 68 years and multiple generations of trainees and practicing clinicians. While medicine and medical education have evolved, readers will appreciate how this classic textbook has retained enduring features that have distinguished it among medical texts—a sharp focus on the clinical presentation of disease, expert in-depth summaries of pathophysiology and treatment, and highlights of emerging frontiers of science and medicine. Indeed, Harrison’s retains its conviction that, in the profession of medicine, we are all perpetual students and lifelong learning is our common goal.

Harrison’s is intended for learners throughout their careers. For students, Part 1, Chapter 1 begins with an overview of “The Practice of Medicine.” In this introductory chapter, the editors continue the tradition of orienting clinicians to the science and the art of medicine, emphasizing the values of our profession while incorporating new advances in technology, science, and clinical care. Part 2, “Cardinal Manifestations and Presentation of Diseases” is a signature feature of Harrison’s. These chapters eloquently describe how patients present with common clinical conditions, such as headache, fever, cough, palpitations, or anemia, and provide an overview of typical symptoms, physical findings, and differential diagnosis. Mastery of these topics prepares students for subsequent chapters on specific diseases they will encounter in courses on pathophysiology and in clinical clerkships. For residents and fellows caring for patients and preparing for board exams, Harrison’s remains a definitive source of trusted content written by internationally renowned experts. Trainees will be reassured by the depth of content, comprehensive tables, and illuminating figures and clinical algorithms. Many exam questions are based on key testing points derived from Harrison’s chapters. A useful companion book, Harrison’s Self-Assessment and Board Review, includes over 1000 questions, offers comprehensive explanations of the correct answer, and provides links to the relevant chapter in the textbook. Practicing clinicians must keep up with an ever-changing knowledge base and clinical guidelines as part of lifelong learning. Clinicians can trust that chapters are updated extensively with each edition of Harrison’s. The text is an excellent point-of-care reference for clinical questions, differential diagnosis, and patient management. In addition to the expanded and detailed Treatment sections, Harrison’s continues its tradition of including “Approach to the Patient” sections, which provide an expert’s overview of the practical management of common but often complex clinical conditions. This edition has been modified extensively in its format as well as its content. We have reincorporated chapters that in previous editions were available only online. The 20th edition marks the return of Harrison’s “Further Reading” citations at the end of each chapter, providing references carefully selected by our contributors. The authors and editors have rigorously curated and synthesized the vast amount of information that comprises general internal medicine—and each of the major specialties—into a highly readable and informative two-volume book. Readers will appreciate the concise writing style and consistency of format that have always characterized Harrison’s. This book has a sharp focus on essential information with a goal of providing clear and definitive answers to clinical questions.

In addition to the printed book, Harrison’s is available on multiple digital platforms, including eBook and app versions, and via an online subscription available through McGraw-Hill’s popular Access Medicine (www.accessmedicine.com) collection. The digital editions feature an array of supplementary videos, databases, and photographic atlases as well as new literature updates, tutorials, animations, and audio discussions covering key topics in medicine. Harrison’s Manual of Medicine is a condensed pocket version of clinical essentials derived from the more comprehensive Harrison’s Principles of Internal Medicine. The Manual is also available as an eBook and an app and via Access Medicine. Together, these platforms form a potent Harrison’s collection of reference, test prep, and point-of-care online content.

In the 20th edition, examples of new chapters include “Promoting Good Health,” focusing on prevention and practical lifestyle changes to enhance longevity and well-being; “Health Care Systems in Developed Countries,” providing a comparison of health delivery models from around the world; “Pharmacogenomics,” applying new approaches for selecting precision medicines and appropriate doses; “Bacterial Resistance to Antimicrobial Agents,” highlighting the widespread and often inappropriate use of antibiotics in clinical care and agriculture; “LGBT Health,” outlining strategies to enhance access and care models for populations with distinctive health care needs; “Neuromyelitis Optica,” summarizing disorders with similarities to multiple sclerosis but requiring different treatments; “Worldwide Changes in Patterns of Infectious Disease,” reviewing the dynamic evolution of new infectious diseases and the containment of older disorders, some of which have plagued humankind for centuries; and “Approach to the Medical Consultation,” providing practical advice to ensure that the consultant addresses the needs of the referring clinician. In addition to these and other new topics, the 20th edition presents a fascinating new series of chapters entitled “Frontiers,” which foreshadows cutting-edge science that will change medical practice in the near term. Examples of new Frontier chapters include “Telomere Disease,” “The Role of Epigenetics in Disease and Treatment,” “The Role of Circadian Biology in Health and Disease,” and “Behavioral Economics and Health.”

In addition to these new topics, major advances in each subspecialty of internal medicine have been incorporated into this edition. Of particular note in this 20th edition are critical updates in the classic chapter on HIV/AIDS, which offers a clinically pragmatic focus as well as a comprehensive and analytical approach to pathogenesis. The updates cover the latest treatment protocols and address the issue of combination prevention modalities, making the chapter the most up-to-date treatise on HIV disease available.

Readers will find expanded coverage of neurodegenerative diseases, highlighting important advances in their classification and management and delineating new mechanisms responsible for the deposition and spread of pathogenic protein aggregates in these disorders. Practical guidance for the use of highly effective therapies for multiple sclerosis is another highlight of the new edition. The chapter on chronic hepatitis discusses in detail the dramatic new discoveries in the use of direct-acting antiviral agents for the treatment and cure of chronic hepatitis C virus disease; these agents are responsible for some of the most exciting therapeutic advances in medicine today.

The promise of the Human Genome Project continues to be realized in clinical medicine. This is reflected throughout the book but particularly highlighted by advances in our understanding of genetic heterogeneity of cancers, including molecular nosology that distinguishes distinct entities that share histologic similarities. The tools of genomics also inform the use of therapies targeting specific genetic lesions and immune system activation. Genetic counseling for patients with genetic predisposition to cancer (e.g., BRCA 1/2) is informing prevention strategies and reducing cancer risk. Our understanding of the microbiome, its relevance to normal physiology and disease pathogenesis, and its implications for treatment of a variety of diseases is expanding rapidly, and these advances are captured in a completely rewritten chapter “The Human Microbiome” and a thoroughly updated chapter “Microbial Genomics and Infectious Disease.” The classification and management of diabetes has been thoroughly updated on the basis of new studies, clinical guidelines, and treatments. Updated guidelines for testosterone management and replacement are based on the results of new clinical trials.

We have many people to thank for their efforts in producing this book. First, the authors have done a superb job of producing authoritative chapters that synthesize vast amounts of scientific and clinical data to create informative and practical approaches to managing patients. In today’s information-rich, rapidly evolving environment, they have ensured that this information is current. We are most
grateful to our colleagues who work closely with each editor to facilitate communication with the authors and help us keep Harrison's content current. In particular, we wish to acknowledge the expert support of Patricia Conrad, Patricia L. Duffey, Gregory K. Folkers, Julie B. McCoy, Elizabeth Robbins, Anita Rodriguez, and Stephanie Tribuna. Scott Grillo and James Shanahan, our long-standing partners at McGraw-Hill Education's Professional Publishing group, have inspired the creative and dynamic evolution of Harrison's, guiding the development of the book and its related products in new formats. Kim Davis, as Managing Editor, has adeptly ensured that the complex production of this multi-authored textbook proceeded smoothly and efficiently. Priscilla Beer and Armen Ovsepyen oversaw the production of our videos and animations. Jeffrey Herzich, along with other members of the McGraw-Hill Education staff, shepherded the production of this new edition.

We are privileged to have compiled this 20th edition and are enthusiastic about all that it offers our readers. We learned much in the process of editing Harrison's and hope that you will find this edition uniquely valuable as a clinical and educational resource.

The Editors
