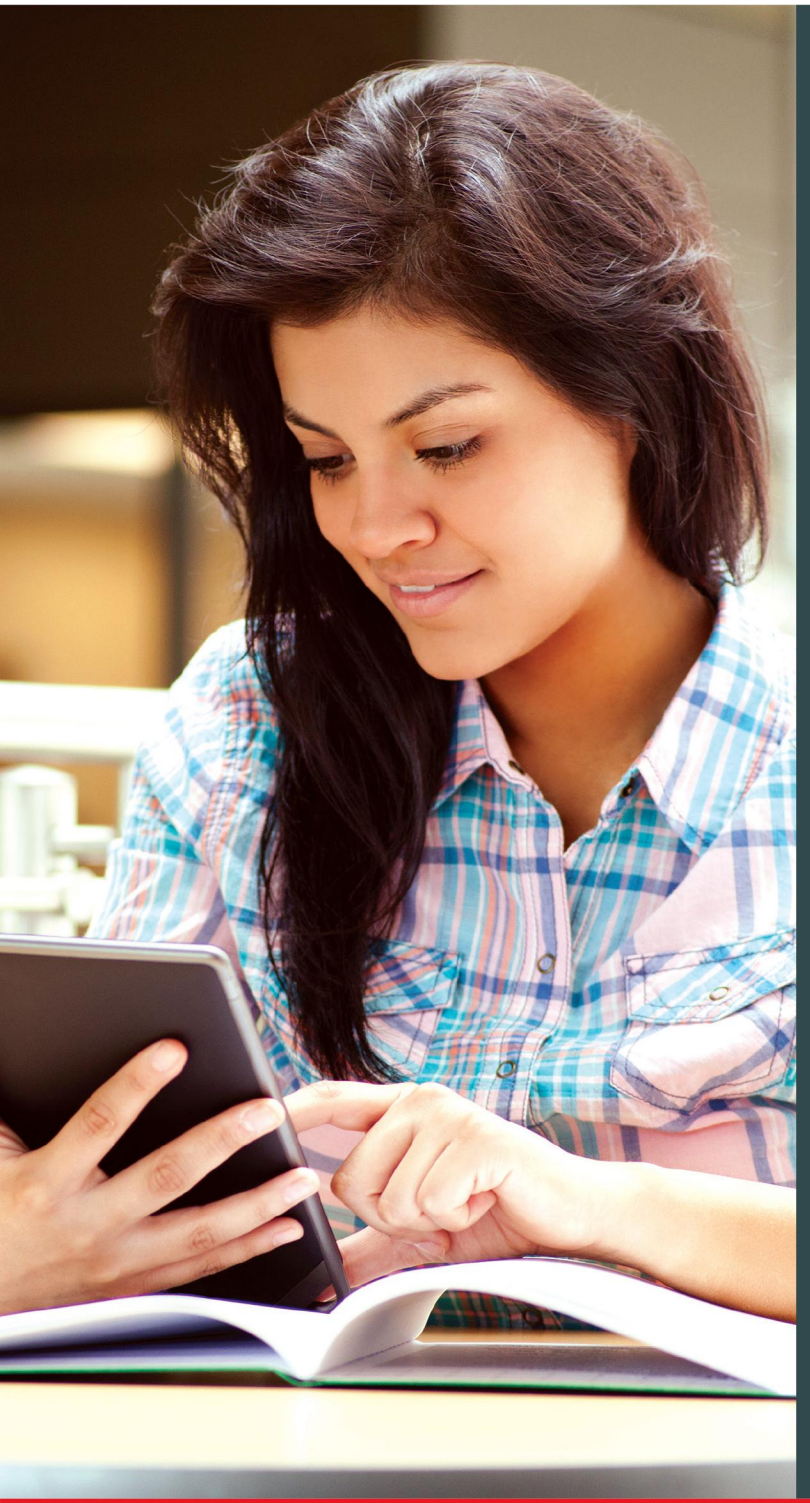
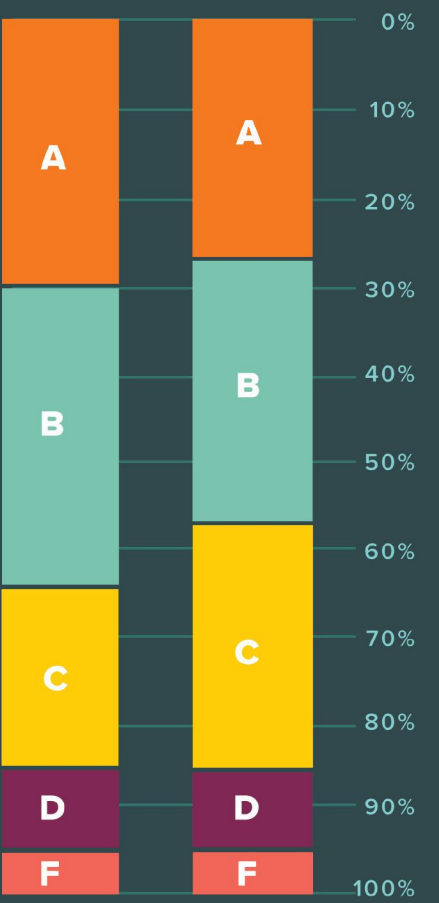
LEARNSMART®

It's Proven.



When *LearnSmart*® is assigned **more B students earn A's and more C students get B's**



LearnSmart Assignments (Experimental) (n–358)

Testbank Question Assignments (Control) (n–332)

In a study involving almost 700 students from six institutions, students experience higher success rates with *LearnSmart*.

For more confidence, better grades, and greater success.

Mc Graw Hill | LEARNSMART®

Understands What Every Student Needs

And the solutions you need to maximize time, potential, and success.

Help students learn faster, study more efficiently, and retain more knowledge. *LearnSmart* is a proven adaptive learning program that helps students succeed by providing a personalized learning path that's based on their responses to questions, as well as their confidence about the answers they provide.

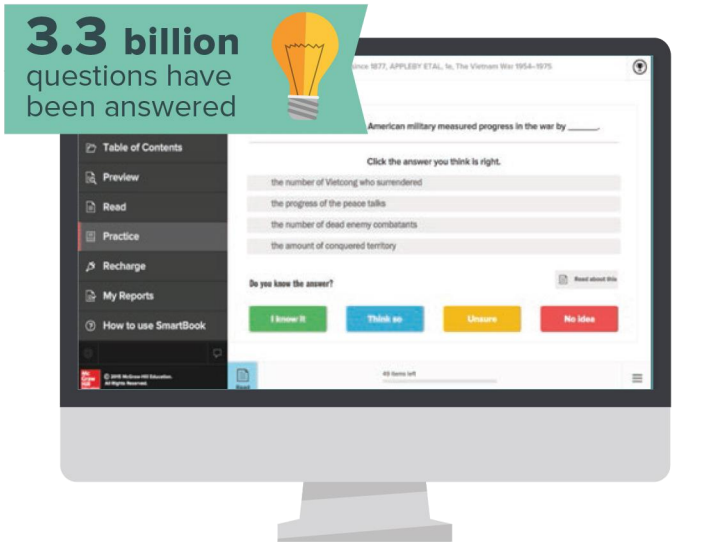
Using revolutionary adaptive technology, *LearnSmart* builds a learning experience unique to each student's individual needs. And it goes beyond simply getting students to memorize material—it helps them truly retain the material in their long-term memory.

Effective study time makes every minute count.

The secret is *SmartBook*®, the first and only adaptive reading experience designed to change the way students read and learn. As the student progresses, *SmartBook* highlights the most impactful concepts the student needs to learn. This ensures that every minute spent with *LearnSmart* + *SmartBook* is the most productive minute possible.

Easy-to-use lessons for you and your students.

There is no additional preparation needed, which makes *LearnSmart* easy to use for teachers. And it is ready for the students to use when they log into their ConnectED online "book bag." *LearnSmart* remembers where the student left off, takes them to the content they have not yet mastered, and reminds them what they need to review.

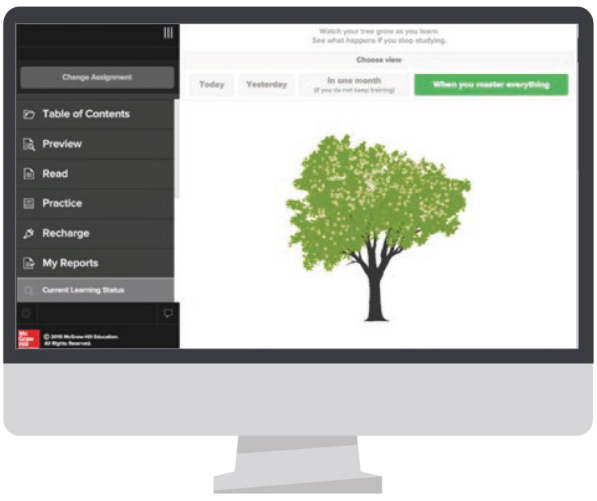


Engage students with a friendly challenge format.

Friendly competition pulls learners in and adaptive technology ensures student progress. As the student answers questions, they're given a score that ranks them with their class. *LearnSmart* adjusts the information presented to each student based upon their strengths and weaknesses as well as their confidence in the material.

Efficient reporting tools help you maximize teaching time.

Real-time reporting tools allow teachers to use their time more efficiently because *LearnSmart* manages and tracks individual student progress or the progress of the whole class. Teachers can focus on what your students don't understand or still need to learn, rather than what they've already mastered. The end result? Students can better prioritize their time and come to class ready to participate.



Integrating *LearnSmart* Into Your Classroom

Model 1: Flipped

Send students into *LearnSmart* to do the "preview," "read," "start practice," and "recharge" so they learn content before coming to class. During class, align the lesson with the *LearnSmart* assignment. Finish the lesson with the assessment for the chapter. Start the cycle with the next chapter.

Model 2: Homework

Introduce the content in class, then assign students to work in *LearnSmart* at home. From this work in *LearnSmart* at home, differentiate instruction based on what students know and don't know. Finish the unit with the assessment.

Model 3: Review

Give the entire lesson. Students then use *LearnSmart* to review for the assessment. Throughout the year, use the recharge function to make sure students are ready for the longer, end-of-course assessment.
