Professor Emeritus at the
West Virginia University School of
Pharmacy.

**Stuart T. Haines, Pharm.D.,
BCPS, BCACP**
Professor of Pharmacy Practice
and Director, Division of Pharmacy
Professional Development at the
University of Mississippi.

Pharmacotherapy involves the *application* of the best available evidence about drug therapy to the care of individual patients. To achieve optimal health outcomes however, practitioners must consistently apply a standardized process of care. In 2014, the Joint Commission of Pharmacy Practitioners (JCPP) – representing all national pharmacy professional organizations in the United States – endorsed the pharmacists' patient care process. Today, all accredited U.S. colleges/schools of pharmacy are required to teach it to students.

A panel of our esteemed editors and authors of *Pharmacotherapy: A Pathophysiologic Approach* and *Pharmacotherapy Casebook: A Patient-Focused Approach* will discuss how to deliver pharmacotherapy using this consistent process of care to the management of patients with acute and chronic diseases. The webinar will conclude with a brief overview of the digital resources available to support you and your students.

Resources available on
ACCESS Pharmacy

AccessPharmacy® from McGraw Hill is a comprehensive online medical resource devoted to the study, instruction, and practice of pharmacy. Authoritative, trusted, and constantly updated content, compiled from the best minds in Pharmacy.
