BRAND NEW!

The Practice Atlas for Anatomy & Physiology is an interactive tool that brings the traditional anatomy atlas into the 21st century! Pairing images of common anatomical models with stunning cadaver photography, this atlas allows students to practice naming structures on both models and human bodies, anytime and anywhere.

The Practice Atlas for Anatomy & Physiology is available as a standard feature of Connect Anatomy & Physiology or can be purchased stand-alone! This product is perfect for use in the following courses:

- 2 Semester A&P
- 1 Semester A&P
- Human Anatomy
- Human Physiology
- Allied Health courses

Connect Anatomy & Physiology

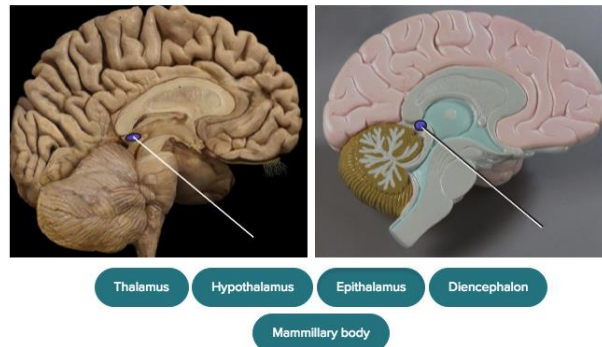

Do you wish you could offer unlimited lab time to your students?

Now you can do one better, by giving them 24/7 digital access to models and cadavers, and the freedom of unlimited practice in a low stakes environment.

Study the Nervous System: Brain

Brain - Sagittal View

Click on the name of each structure to reveal its location on the cadaveric and model images.

Meet students where they live!

Allow students to practice identifying structures inside and outside of the lab.

Practice the Nervous System: Brain

Brain - Sagittal View

Identify the structures of the brain model.
